CERTIFIED MAIL  
RETURN RECEIPT REQUESTED

Russell T. Dawe  
Director

July 19, 1976

Mr. Raymond J. Verneti  
County Clerk Pro Tem  
Macoupin County Board  
County Courthouse  
Carlinville, ILL 62626

Dear Mr. Verneti:

The Illinois Department of Mines and Minerals under the Surface-Mined Land Conservation and Reclamation Act (P.A. 78-2295 effective July 1, 1975) and under its Rules and Regulations (effective February 6, 1976) will issue a Surface Mining Permit to Midstate Stone Corporation (Gillespie Quarry) of Gillespie, Illinois, for 15 acres during the permit period ending June 30, 1977.

Pursuant to Rule 708 and in response to your letter of May 19, 1976, this office sends the following information.

1. The operator's plan complied with the rules in stating that inside slopes will be graded to 15 percent and outside slopes will be graded to 30 percent for pasturetype reclamation. Acreages are not required to be estimated because they are variable; but if mining continues here beyond this permit, the outside slopes may not amount to more than 10 percent of the permit area involved under this permit.
2. If there is no final cut in this permit area because of later filling under subsequent permits, then there may be no pond at all in this particular permit area. If there is no pond, its banks undoubtedly would be part of the inner slopes which come under the 15 percent requirement mentioned in item 1 above. Any pond banks created will be of suitable slope and soil for pasture cover and livestock access.
3. The vegetative requirements stated in the law and the rules guarantee a successful legume-grass pasture stand or forfeiture of bonds. Most qualified agriculturists approve of alfalfa-brome grass pasture in central Illinois. The type of machinery to be used is not dictated by the law so long as the results comply with the law. This office also recommends to the operator proper tillage and tools, soil testing, and an adequate fertility program. If the operator's results are unsuccessful, he will be required to use accepted workmanlike techniques to be successful.
4. The law covering grading requirements is covered in detail in Rule 1101 and is repeated in the operator's reclamation plan. The law covering seeding requirements is covered by the same Rule 1101 and others.
5. The reclamation plan calls for pasture and does not plan for row crops or small Grain, although they may be grown in future years. Drainage and ponding should be no problem on rolling land with 15 percent slopes. Proper drainage also concerns

this office. If it ever becomes a problem, the law has remedies to correct it.

Also pursuant to Rule 708 this letter is a statement of the Department's reasons for its determination and it makes this statement public through you. A copy of this decision and statement is being mailed by the Department to the applicant and to you, the County Clerk, by registered mail, return receipt requested. According to Rule 708, the County Clerk shall forward such decision and statement to the presiding officer of such county board by registered mail, return receipt requested. We appreciate your cooperation in this matter.

Sincerely,

/s/ E. E. Filer, Supervisor  
Land Reclamation Division
